

# Santa Claus Paper Bag Puppet

## Supplies needed:

- Paper bag
- Construction paper for eyes, nose, hat, beard, belt
- Glue
- Scissors
- Markers or crayons
- Optional - googly eyes, red pom poms for nose, yarn for beard/hat trim, cotton balls for beard/hat trim

Using the red construction paper, cut out the main part of the hat, an oval for the nose, and a long rectangle for the belt. Cut out the buckle of the belt with black construction paper (see picture above).

Use white construction paper to finish the hat trim and the beard/mustache. Or, use white yarn or cotton balls for these areas.

Santa's eyes can be formed using store bought "googly eyes" or by cutting out eyes with construction paper .

Now, glue your construction pieces to the bag. Glue the beard just bellow the flap. Glue the mustache on the edge of the flap overlapping a little. Glue the nose overlapping the mustache a little. Glue the hat trim to the main part of the hat, then glue the completed hat to the top of the bag. Glue the black buckle to the red rectangle, and then glue the whole buckle to the bottom of the bag. Enjoy!
