

Join Five Instructions

How To Play (One or Two Players)

Take turns drawing a five segment line (or, a line made up of five dots) from four dots on the grid. The player draws in the fifth dot at the end of the new line or in the middle (see diagrams below). Do not retrace any portion of a previously drawn line with a new line. The winner is the last person who draws a line segment. If playing the single player version, keep score by counting the number of segments drawn and try to beat yourself the next time!

(1st turn of Joint Five Game)

(Join Five Game after five turns)
